

WHAT IS CLAIMED IS:

1. A kit comprising:
 - i) a filter for providing potable water, comprising:
 - (a) a housing having an inlet and an outlet; and
 - (b) a filter material disposed within said housing formed at least in part from a plurality of mesoporous activated carbon filter particles; and
 - ii) a package for containing the filter; andwherein either the package or the filter housing comprises information that the filter or filter material provides: bacterial removal; virus removal; microbial removal; killing of bacteria, killing of viruses, killing of microbials, or any combination of these.
2. The kit of claim 1, wherein the sum of the mesopore and the macropore volumes of said plurality of mesoporous activated carbon filter particles is between about 0.2 mL/g and about 2 mL/g.
3. The kit of claim 1, wherein said plurality of mesoporous activated carbon filter particles has a BRI of greater than about 99%, and aVRI of greater than about 90%.
4. The kit of claim 1, wherein said filter material has a F-BLR of greater than about 2 logs, and a F-VLR of greater than about 1 log.
5. The kit of claim 1, wherein said filter material has a single-collector efficiency, η , of between about 0.005 and 0.25, and a filter coefficient, λ , between about 40 m⁻¹ and about 14,000 m⁻¹.
6. The kit of claim 1, wherein said plurality of mesoporous activated carbon filter particles are basic and have a point of zero charge between about 9 and about 12, an ORP between about 290 mV and about 175 mV.

7. A filter for providing potable water, comprising:
 - (a) a housing having an inlet and an outlet; and
 - (b) a filter material disposed within said housing formed at least in part from a plurality of mesoporous activated carbon filter particles and particles selected from the group consisting of mesoporous activated carbon filter particles coated entirely with silver or a silver containing material, mesoporous activated carbon filter particles partially coated with silver or a silver containing material, silver particles and mixtures thereof.
8. The filter of claim 7, wherein the sum of the mesopore and the macropore volumes of said plurality of mesoporous activated carbon filter particles is between about 0.2 mL/g and about 2 mL/g.
9. The filter of claim 7, wherein said plurality of mesoporous activated carbon filter particles has a BRI of greater than about 99%, and aVRI of greater than about 90%.
10. The filter of claim 7, wherein said filter material has a F-BLR of greater than about 2 logs, and a F-VLR of greater than about 1 log.
11. The filter of claim 7, wherein said filter material has a single-collector efficiency, η , of between about 0.005 and 0.25, and a filter coefficient, λ , between about 40 m⁻¹ and about 14,000 m⁻¹.
12. The filter of claim 7, wherein said plurality of mesoporous activated carbon filter particles are basic and have a point of zero charge between about 9 and about 12, an ORP between about 290 mV and about 175 mV.
13. A filter for providing potable water, comprising:
 - (a) a housing having an inlet and an outlet; and
 - (b) a filter material disposed within said housing formed at least in part from a

plurality of mesoporous activated carbon filter particles and other materials selected from the group consisting of activated carbon powders, activated carbon granules, activated carbon fibers, zeolites, activated alumina, activated magnesia, diatomaceous earth, activated silica, hydrotalcites, glass, polyethylene fibers, polypropylene fibers, ethylene maleic anhydride copolymers fibers, sand, clay and mixtures thereof, wherein at least a portion of the other materials are coated with silver or a silver containing material.

14. A kit comprising:

- i) a filter according to claim 7; and
- ii) a package for containing the filter; and

wherein either the package or the filter housing comprises information that the filter or filter material provides: bacterial removal; virus removal; microbial removal; killing of bacteria, killing of viruses, killing of microbials, or any combination of these.

15. A kit comprising:

- i) a filter according to claim 13; and
- ii) a package for containing the filter; and

wherein either the package or the filter housing comprises information that the filter or filter material provides: bacterial removal; virus removal; microbial removal; killing of bacteria, killing of viruses, killing of microbials, or any combination of these.
